History

Since 1996, Mideast Solutions team has been serving hundreds of customers; provide designing, developing and maintaining web based solutions for businesses ranging in size from large corporations to governmental organizations as well as small businesses.

In 2003, After years of experience in Middle East market, looking for expanding our market and serving more number of clients with higher quality solutions in the region, we've moved to Dubai Internet City in Dubai, United Arab Emirates as the heart of Middle East information technology business activities.

Culture

We brought together talented professionals with ideas and expertise to provide solutions unique to each of our projects. The designers, developers, architects and customer service experts at Mideast Solutions possess over years of knowledge and experience, guarantees our clients do receive the highest quality, performance and functionality for their projects.

Our solutions are based on a combination of the latest technology, high quality design and development, comprehensive business experience and competitive rates.

Mission

Mideast Solutions' mission is to improve people's life using innovation and technology. With that goal in mind, Mideast Solutions is focusing on driving the future of localized software solutions by designing and developing products that help regional users take advantage of new software and internet technologies.

Mideast Solutions will continue to break new ground by integrating web technologies into all aspects of the daily life and business activities in the middle east.
